Intersolar 2011 Showcases SGS Solar Services

Intersolar Europe, the world s largest solar industry exhibition, attracted 77,000 visitors and 2,280 exhibitors at its 2011 exhibition held in Munich, Germany. The exhibition, held between June 8 and 10, generated great excitement as it focused on energy revolution and technological solutions for the dawn of the solar-powered age.

In June 2011, 2,280 exhibitors presented their technologies and associated services in the fields of Photovoltaics , PV Production Technology and Solar Thermal Technology in Munich s vast exhibition space, covering 168,000 square meters that includes 15 exhibition halls and an outdoor exhibition area. In accordance with the growth of the industry itself, the world s largest solar industry exhibition Intersolar boasted a significant increase in the information provided on all of the topics covered by the exhibition.

SGS Solar Services was honored to be at the exhibition, and from its booth presented its capabilities in the field of solar technologies including its newly won Certification Body (CB) accreditation. SGS attracted a high number of visitors to its booth at Intersolar 2011 in direct reflection of the market interest in fast, high quality qualification services and solutions for the solar technology industry.

SGS Solar Testing at the Solar Test House

Located in the Solar Valley of Middle Germany, the Solar Test House has formed part of the SGS Group s service portfolio since February 25, 2009. The service concept of the SGS Solar Test House not only encompasses testing and certification of photovoltaic panels according to the most important standards of IEC 61215, IEC 61646 and IEC 61730-1/2, but also covers the complete value-creation process.SGS Solar Services has again been showcasing its full repertoire of services at its booth at the PVSEC Exhibition in Hamburg, Germany, at the beginning of September.

If you need further information, our experts would be glad to hear from you.
