End of Transition Period for Australian Electrical Standards

The three-year transition period for the single compliance mark is ending February 2016.

Compliance Mark for Electrical Products

The single Regulatory Compliance Mark (RCM) was introduced including a three-year transition period.

The RCM illustrates a product's compliance with all applicable ACMA standards telecommunications, radio communications, electromagnetic compatibility (EMC) and electromagnetic energy (EME).

Suppliers must register on the online national database and start using the RCM.

Phasing out C-Tick and A-Tick

Products that have already been labeled with the C-Tick or A-Tick can continue to be supplied until labeled stock has been exhausted.

Make sure your products are in compliance - Contact us.

About SGS Services for the Consumer Goods and Retail Industry

As the world's leader in third party testing, SGS has the global knowledge and local expertise to help you achieve compliance with Electrical & Electronics. Whether you are in need of testing or services in the fields of inspection, [electrical safety certification](#), compliance assurance, outsourcing, training or auditing, SGS is ideally positioned to assist you with your needs.
