Have your products SGS EPA WaterSense certified

WaterSense is a partnership program administered by the US Environmental Protection Agency (EPA). The program encourages efficient water use and innovation in product design to conserve one of earth's most precious resources - fresh water.

Why WaterSense?

With the WaterSense label you can easily identify water-efficient, high-performance products. Furthermore, WaterSense will evaluate labeling water-efficient products in many categories of interest.

SGS Consumer Testing Services in the US is a licensed certifying body by the US Environmental Protection Agency to provide product certification to WaterSense criteria. SGS's plumbing laboratories are fully capable of providing local lab testing and factory verification services to support its clients in obtaining EPA WaterSense Certification. Testing services for faucets and high efficiency toilets are available in the US and China labs to fulfill client needs at points of production and distribution.

SGS Full Service Plumbing Labs Have Capabilities to Meet Global Testing Requirements:

The SGS CTS US lab is an EPA WaterSense Licensed Certifying Body, as well as, ISO Guide 65 Accredited for Plumbing Product Certification. A further SGS US lab in Tulsa, Oklahoma, is ISO 17025 Accredited by IAS (International Accreditation Services) and can perform tests to Uniform Plumbing Code (UPC)® and to International Plumbing Code (IPC)®. The SGS CTS lab in Shanghai, China, is also ISO 17025 Accredited by CNAS (China National Accreditation Services).

Why choose SGS WaterSense Certification?

The SGS WaterSense Certification is a ONE STOP Service for Water Consumption Products: Water Sense Certification, plumbing product performance Certification, Laboratory Testing, and Factory Auditing/Inspection Services. It is also a LOCAL Service, SGS has authorized testing labs and experts worldwide to provide prompt services and fast turnaround times close to your site.
