SGS Invitation to Attend Free Webinar on Non-Destructive Testing (NDT) Certification

SGS is delighted to invite you to attend one of its free 60-minute webinars presented by the SGS Competence Center for Non-Destructive Testing. Hosted by Jason Scott, NDT Strategic Operations Development Leader at SGS, the webinar, entitled Understanding NDT Certification, will focus on explaining the basic principles of NDT certification and its correct implementation.

Non-destructive testing (NDT) certification presents a very complex process, interpreted differently around the world, which causes confusion and misunderstanding among customers. Since operating assets are examined and evaluated in terms of integrity, quality and safety, it is of utmost importance to verify the competence of NDT inspectors and ensure the correct implementation of a certification process.

In light of a growing interest in [non-destructive testing services](#), SGS is pleased to invite you to a free 60-minute webinar, entitled Understanding NDT Certification.

With this free, globally available webinar on April 10 and April 12, 2012, SGS will explain the basic principles of NDT certification and the need to understand how to implement NDT certification systems correctly.

With extensive experience and expertise in the field of non-destructive testing, SGS will inform participants about the difference between the central and employer-based certification, training, experience requirements and examinations for NDT inspectors.

Furthermore, attendees will learn about the SNT-TC-1A employer-based certification scheme for NDT personnel, as well as new developments in NDT certification.

Hosted by Jason Scott, NDT Strategic Operations Development Leader at SGS, the free 60-minute webinar will be available across the globe in Asia, Europe, the Americas and Africa in four sessions to meet the needs of attendees in every time zone.

Four webinar sessions are scheduled, twice on each of two days:

Tuesday, April 10, 2012:

10:00 a.m. Europe Time (Amsterdam, GMT+02:00)
12:00 p.m. Arabian Time (Abu Dhabi, Muscat, GMT+04:00)
4:00 p.m. Singapore Time (Singapore, GMT+08:00)

4:00 p.m. Europe Time (Amsterdam, GMT+02:00)
11:00 a.m. S. America Eastern Time (Buenos Aires, GMT-03:00)
9:00 a.m. Central Standard Time (Chicago, GMT-05:00)

Thursday, April 12, 2012:

10:00 a.m. Europe Time (Amsterdam, GMT+02:00)
12:00 p.m. Arabian Time (Abu Dhabi, Muscat, GMT+04:00)
4:00 p.m. Singapore Time (Singapore, GMT+08:00)

4:00 p.m. Europe Time (Amsterdam, GMT+02:00)
11:00 a.m. S. America Eastern Time (Buenos Aires, GMT-03:00)
9:00 a.m. Central Standard Time (Chicago, GMT-05:00)

To obtain more information about the webinar Understanding NDT Certification and to find out how to register, visit the [SGS Webinar Calendar](#).

About Non-Destructive Testing Services by SGS

From construction sites, pipelines and refineries to shipyards and nuclear power plants, SGS monitors and improves the reliability of processes and equipment. SGS's [non-destructive testing \(NDT\) services](#) offer complete or sample examination of assets, using well-designed procedures and highly trained and certified NDT inspectors. As a result, SGS provides complete and valuable data, enabling clients to make informed asset management decisions.
